

# **Strong power**

## **Crawler transport vehicle**

**Pulling sand and gravel/pulling wood/orchard transportation**

**No fear of difficult terrain**

**Low fuel consumption and more fuel-efficient**

# A variety of styles to choose from

Choose between ride-on/stand-up according to different needs

## Standing

Foot platform

Operation table

## Seated

Luxury seats

Operation table

**High cost performance**

**Same quality, higher price,  
refund the difference**

**Engineering rubber tracks**

**Non-slip and wear-resistant with  
strong grip**

**Ordinary crawler tracks are easy to fall  
off**

**Can't handle muddy roads**

**Track**

## Power

### Brand Engine

Full power and nationwide warranty

### Poor quality engine

Poor power and difficult climbing

## Material

Thickened and reinforced carriage

Good sealing and heavy load

Ordinary sheet metal carriages are weak

Poor sealing and short service life

# Hydraulic dump function

## Fast and labor-saving

Thickened chassis for 45° hill climbing and mountain off-roading

Orchard transportation/cargo yard loading/breeding material transportation

# Applied in various fields

Rugged mountain roads/agricultural orchards/muddy swamps/construction projects, etc.

**Terraced Fields**

**Paddy Field**

**Orchard**

**Construction Site**

**Forest Farm**

**Mining**

**Water conservancy ditches**

**Muddy Road**

**Rugged mountain road**
